

NOTES ABOUT MY WORKS

This series of cartoons describe a young agricultural engineer's story which was really happened in Wulingyuan historic and scenic sites, hero of the comics named Qiangqingnuo, since 1964 ,he had been work for Zhangjiajie national forest park which was named Zhangjiajie national forest at the time. During his work, he had been always focusing on the domestication of wild plant species ,planting and improvement. He has successfully introduced of the red bayberry, tea, and local famous pears species. Because of this, local people had made great benefits from many agricultural products with market economic values, meanwhile, he has made a great contribution to agri-biodiversity by seed-collection ,planting new plant species ,especially the wild dove tree species. But unfortunately, in 1979 , he was 39, in order to collect precious dove tree seeds, he fell off cliff of 28 meters, and never opened his eyes,from then on , a young ,passionate man is away from us.

Single cartoon shows:

1. There was sea where my WHS locates in at the time of the middle and late Devonian period of the late Palaeozoic Era.
2. Due to external factors such as erosion ,weathering and anty-weathering and gravitational devolution, the place became strange and exotic groups of peaks and deep gullies.
3. A young man came to the place to begin his career in forestry protection after graduated from college.
4. he married and rooted in this place.
